

HOLLAND STREET, BIRMINGHAM,

May 1st, 1876.

Owing to the numerous applications and general wishes of our customers to be supplied with a Book of Fender Designs to assist them in ordering, and to take orders from, we have brought out a smaller book to bind with our Fire-Iron Book.

We have carefully selected the Newest and most Saleable Patterns for this Book, but all the old patterns can be supplied as usual.

Most of the Rail Fenders can be had with Plain Steel Supports for 7/- extra, or with Ormolu Supports about 12/- extra. If required with Steel Bottom Spring either left Bright or Blacked, about 5/- to 7/- extra.

The first column in Price List representing first four sheets of designs are not Fine Cast and will not do for a best trade, but are showey useful fenders at a low price, for instance, No. 991 is heavier and deeper fender than No. 51.

We do the Largest Fender Trade of any house extant, and give it special attention, but there being such a variety of patterns and sizes few can be stocked, we would therefore ask our friends to send on orders as early as possible to enable us to forward without disappointing them.

Yours respectfully,

J. & E. FRAZER.
